### "Flat Earthers Reaffirm Beliefs"

---

Flat Earthers hold conferences, asserting Earth's flatness, challenging conventional science on our planet's shape.

Scientific evidence and observations overwhelmingly support the Earth's spherical shape, reinforced by data from organizations like ESA and NASA.

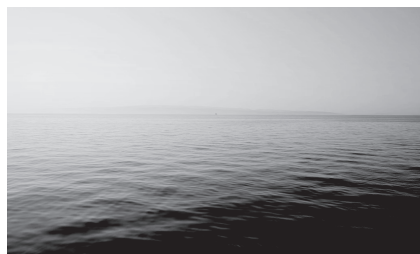

---

### "Growing Interest in Artificial Intelligence"

---

The adoption and application of artificial intelligence continues to increase, transforming various industries and technologies.

According to a report by Statista, global spending on artificial intelligence and data analytics systems is estimated to reach \$110 billion in 2024.

---

### "Increase in Sea Levels Raises Concerns"

---

Sea levels continue to rise, threatening coastal communities and marine ecosystems.

According to the 2021 IPCC report, global sea levels have risen by about 20 cm since 1901, posing significant risks to coastal areas, including flooding, erosion, and damage to infrastructure and ecosystems.

---

### "Rise in Youth Drug Use"

---

A troubling increase in drug consumption among young people from various regions is being reported, raising alarms among public health officials and communities alike.

According to the 2020 National Survey on Drug Use and Health in the U.S., there has been an increase in illicit drug use among young adults compared to previous years.

### **"Increase in Natural Disasters"**

Natural disasters, such as hurricanes and droughts, show an increase in frequency and intensity.

According to the U.S. National Oceanic and Atmospheric Administration (NOAA), the rise in global temperature has contributed to more intense and frequent extreme weather events, including stronger hurricanes and longer droughts.

---

### **"Global Climate Agreement"**

Countries come together in an effort to combat climate change through a global agreement.

The Paris Agreement, adopted in 2015, is an example of an international climate agreement in which 196 countries participate with the aim of limiting global warming to safe levels.

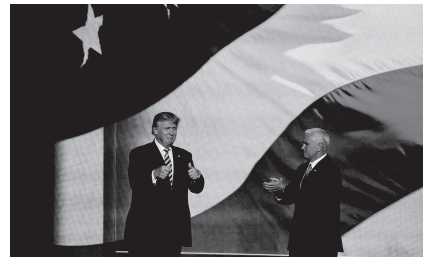

---

### **"Success of Vaccination Campaigns"**

Vaccination campaigns have demonstrated their effectiveness in significantly reducing severe cases of diseases.

According to the Centers for Disease Control and Prevention (CDC), vaccines have led to a drastic decrease in the incidence of diseases such as polio and measles in recent years.

---

### **"Controversy under Donald Trump"**

Donald Trump's tenure was marked by contentious decisions and statements, sparking widespread debates and discussions.

During his presidency, Donald Trump enacted divisive immigration policies, pulled the U.S. out of the Paris Agreement, and became the second president impeached by the Senate.
